

Fashion & Streetwear — Full Proposal Template

Purpose

This is the Tier 3 document: the full Visiomind proposal, sent only to prospects who have had a real conversation and are considering engagement. It follows the fixed 9-section structure adapted for fashion and streetwear brands.

Structure

01 — Why We Are Reaching Out

One to two paragraphs explaining why [Brand Name] caught our attention. Reference the earlier conversation or diagnostic.

Example:

We first reached out to [Brand Name] because the quality of the product clearly positions it in the premium segment of the Lagos fashion market. After our conversation on [date], it became clear that the brand is at a stage where the identity and digital experience need to evolve to match the ambition of the product and the direction the company is heading.

02 — What We Observed

Expand the observations from the mini-diagnostic into a more detailed assessment. Include screenshots or visual references where possible.

For fashion brands, common areas to address:

- Brand identity — logo, typography, colour palette, and how they perform across print, digital, and product
 - Packaging and tags — whether the unboxing experience matches the price point
 - Website / ecommerce — layout, product photography presentation, navigation, checkout, mobile experience
 - Social media — grid consistency, content quality, caption voice, hashtag strategy
 - Campaign materials — lookbook design, campaign art direction, marketing collateral
 - Competitor comparison — how [Brand] presents relative to peers at the same or lower price points
-

03 — The Business Implication

Explain why the observations matter commercially. Avoid vague claims. Be specific about the mechanism.

Example:

When the brand presentation does not match the product quality, it creates friction at two critical points: discovery and conversion. A potential customer who encounters [Brand Name] for the first time through Instagram or a friend's recommendation may not immediately understand the positioning. And a customer who reaches the website may not feel the level of trust and quality that justifies the price point. This is not a design problem in isolation. It is a commercial problem that affects customer acquisition cost, perceived value, and willingness to pay.

04 — Our Hypothesis

Frame the root cause and the opportunity.

Example:

We believe the core issue is not that [Brand Name] lacks a brand. The brand exists in the product, the creative direction, and the founder's vision. The issue is that this brand has not yet been translated into a systematic, consistent identity that performs across every touchpoint. The opportunity is to build that system so that every customer interaction, from the first Instagram impression to the unboxing, communicates the same level of quality and intention as the product itself.

05 — What Visiomind Proposes

Scope the engagement to the diagnosis. Do not propose services the prospect does not need.

Possible components for fashion brands:

Phase 1 — Brand Strategy (2-3 weeks)

- Brand positioning and competitive analysis
- Target audience definition
- Brand architecture (if multiple product lines)
- Messaging framework

Phase 2 — Identity System (3-4 weeks)

- Logo redesign or refinement
- Typography system
- Colour palette (primary, secondary, accent)
- Visual language and photography direction
- Pattern and texture system (if applicable)
- Brand guidelines document

Phase 3 — Digital Experience (3-4 weeks)

- Website design (or ecommerce redesign)
- Mobile-first responsive design
- Product page templates
- Lookbook and campaign page templates

Phase 4 — Brand Applications (2-3 weeks)

- Packaging design (tags, bags, boxes, tissue)
- Social media template system
- Campaign template system
- Print collateral (business cards, lookbook layout)

06 — What We Would Deliver

Concrete, countable deliverables. Example:

- Brand strategy document (positioning, audience, messaging)
- Logo suite (primary, secondary, icon, monogram) in all required formats
- Typography specification
- Colour palette with Pantone, CMYK, RGB, and HEX values
- Brand guidelines document (40-60 pages)
- Photography and art direction guidelines
- Website design (8-12 pages, responsive, ecommerce-ready)
- Packaging design (3-5 items: hang tag, garment bag, shopping bag, box, tissue)
- Social media template kit (10-15 templates for Instagram, stories, and reels covers)

- Campaign template system (lookbook spread, digital ad, poster)

07 — Expected Business Outcome

Honest, defensible outcomes. No revenue promises.

Example:

The objective is to create a brand system where [Brand Name]'s market positioning is immediately clear to anyone who encounters the brand at any touchpoint. Specifically:

>

- Stronger perceived value, closing the gap between product quality and brand presentation

- A consistent visual language that makes the brand instantly recognizable across platforms

- A digital experience (website) that converts at a level appropriate for the price point

- A scalable system that supports future collections, collaborations, and expansion without requiring a redesign each time

- Professional-grade brand assets that allow the team to produce on-brand content without relying on external designers for every post

08 — Why Visiomind

Short. Relevant to the prospect.

Example:

Visiominds is a multidisciplinary design studio based in Lagos. We work at the intersection of brand strategy, identity design, and digital experience. Our team of 3-6 people per project includes strategists, designers, illustrators, and developers.

>

Relevant experience:

- Cleaniche — complete brand identity and digital experience for a fashion brand repositioning from mid-market to premium

- VOLL — brand identity and packaging for a lifestyle brand

- [Other relevant project]

>

We start with strategy because we have seen too many fashion brands invest in beautiful design that does not solve the actual business problem. Our process ensures the design decisions are driven by commercial objectives, not aesthetic preference alone.

09 — Proposed Next Step

Clear, specific, low-friction.

Example:

If this aligns with the direction you are considering for [Brand Name], we propose a 45-minute discovery session where we walk through the full diagnosis, answer your questions, and discuss scope and timeline.

>

We can schedule this at your convenience. You can reach us directly at:

- WhatsApp: +234 703 178 3580

- Email: hello@visio-minds.com

>

We look forward to the conversation.

Offer Mapping (internal, not included in proposal)

Need	Recommended Offer
One deliverable (identity, website, or pitch deck)	Visio Lens (from \$3,000)
Identity + website or identity + packaging	Visio Sprint (\$10,000, 4-week sprint)
Full system (strategy + identity + digital + applications)	Visio Rebuild (from \$25,000, 3-4 months)
Ongoing design and marketing support	Visio Partner (\$3,500/month retainer)
Entry point / qualification	Visio Audit (free 60-minute brand audit call)

Pricing is discussed during the discovery call, not included in the initial proposal unless the prospect specifically asks.

Writing Rules

1. The proposal must feel tailored to this specific brand. Generic language kills deals at this stage.
2. Reference the earlier conversation. Quote something the founder said if possible.
3. Scope only what the diagnosis supports. Do not pad the proposal with services they do not need.
4. Keep the document to 8-10 pages. Longer proposals do not close better.
5. Include visuals: screenshots of their current brand, examples from Visiominds portfolio, before-and-after from relevant case studies.
