

Health & Wellness — Full Proposal Template

Structure

01 — Why We Are Reaching Out

[Brand Name]'s service quality and client results are clearly genuine. After our conversation, it became clear that the brand identity and digital presence need to evolve to match the professionalism of the service and support the company's growth.

02 — What We Observed

- Brand identity — logo, typography, colour, and visual language across digital and physical touchpoints
- Website — service presentation, booking flow, practitioner profiles, testimonials, trust signals, mobile experience
- Physical environment — space design direction, signage, interior branding, printed materials
- Photography — quality, styling, whether images capture the environment and expertise
- Social media — content quality, consistency, educational content, client stories
- Marketing — referral materials, partnership collateral, advertising
- Competitive positioning — brand comparison with similar businesses in the area

03 — The Business Implication

Brand perception affects booking rates, referral quality, and pricing power. A professional, cohesive brand builds client confidence before the first appointment and makes referrals easier because clients feel proud to recommend the business. The current brand creates unnecessary friction at both points.

04 — Our Hypothesis

The service has earned client loyalty. The brand has not yet been built to match. As [Brand Name] grows, whether through new locations, additional services, or product lines, the gap between service quality and brand quality becomes more limiting. The opportunity is to build a brand system that amplifies the trust the service already earns.
