

Visiomind Outbound Engine

Purpose

This is the operating system for Visiominds outbound sales. Every prospect passes through a structured pipeline. Every vertical has its own research, outreach copy, diagnostic, and proposal materials. The objective is qualified conversations that lead to signed clients, not volume for its own sake.

Pipeline

DISCOVER → QUALIFY → RESEARCH → DIAGNOSE → OUTREACH → FOLLOW-UP → CONVERSATION → PROPOSAL → CLOSE

Effort Tiers

Tier	Trigger	Deliverable	Volume
Tier 1	Cold prospect identified	Short personalized message (DM or email). No PDF, no deck.	500 prospects total
Tier 2	Prospect responds or shows interest	2-4 page mini-diagnostic specific to their brand	10-15% of Tier 1
Tier 3	Qualified conversation, real buying intent	Full designed Visiomind proposal (8-10 pages)	3-5% of Tier 1

The PDF proposal is never the first contact. The first contact earns the right to send the diagnostic.

Research Framework (per company)

A. Company

What they sell. Target customer. Business model. Market position. Size and stage. Recent launches or developments. Growth signals.

B. Brand

Logo and identity system. Visual consistency across touchpoints. Photography style. Typography. Packaging (if applicable). Social media presence. Campaign quality. Brand differentiation from competitors.

C. Digital Experience

Website quality. Ecommerce experience (if applicable). Mobile experience. Conversion journey. UX problems. Product presentation. Navigation clarity. Trust signals. Calls to action.

D. Marketing

Social content quality. Campaign execution. Advertising. Messaging clarity. Content production value. Whether visual communication matches desired market position.

E. Business Signals

Trigger events that create a "why now" reason: new product launch, expansion, funding, new location, hiring, new collection, weak digital presence, outdated identity, inconsistent communication, entering a new market.

Diagnosis Framework

For each qualified prospect, identify ONE major commercial opportunity.

Structure every diagnosis as:

1. Observation - what we specifically noticed
2. Evidence - concrete examples (screenshots, links, comparisons)
3. Business implication - why this matters commercially
4. Hypothesis - what we believe the root cause is
5. Proposed intervention - what Visiomind would do about it

Verticals (10)

#	Vertical	Prospect Count	Folder
01	Fashion & Streetwear	50	01-fashion-streetwear/
02	Beauty & Personal Care	50	02-beauty-personal-care/
03	Food & Beverage	50	03-food-beverage/
04	Real Estate & Property	50	04-real-estate-property/
05	Hospitality & Events	50	05-hospitality-events/
06	Tech & SaaS	50	06-tech-saas/
07	Fintech & Financial Services	50	07-fintech-financial-services/
08	Health & Wellness	50	08-health-wellness/
09	Entertainment & Media	50	09-entertainment-media/
10	Education & Professional Development	50	10-education-professional-development/

Per-Vertical Folder Contents

Each vertical folder contains:

File	Purpose
outreach-copy.md	Tier 1 DM/email templates customized for this vertical's common pain points
mini-diagnostic-template.md	Tier 2 framework: 2-4 page diagnostic structure for this vertical
proposal-template.md	Tier 3 framework: full Visiomind proposal structure for this vertical
prospects.md	50 researched companies with diagnosis, decision-maker, and opportunity

Proposal Structure (Tier 3)

Every full proposal follows this fixed framework, adapted to the vertical:

1. Why we are reaching out - why this company caught our attention
2. What we observed - specific observations, not generic claims
3. The business implication - why the problem matters commercially
4. Our hypothesis - what we believe is the root issue
5. What Visiomind proposes - the solution, scoped to the diagnosis
6. What we would deliver - concrete deliverables list
7. Expected business outcome - honest, defensible expected results
8. Why Visiomind - relevant capabilities and experience
9. Proposed next step - clear, specific call to action

Outreach Rules

1. Every message references one specific, genuine observation about the prospect's brand.
2. The message opens a conversation. It does not pitch services or attach a deck.
3. The tone matches the vertical. Fashion gets creative-confident language. Fintech gets business-outcome language. Real estate gets trust-and-premium language.
4. Every message ends with a low-pressure next step, not "let us know if you're interested."
5. Follow-up sequence: 2-3 thoughtful follow-ups spaced 4-7 days apart. Each adds new value (a relevant observation, a case study link, a market insight).

Qualification Criteria

A prospect is worth pursuing if they meet at least 3 of these 5:

1. Budget signal - revenue, funding, premium pricing, visible marketing spend
2. Visible brand gap - identity inconsistency, outdated visuals, weak digital presence
3. Business trigger - recent launch, expansion, rebrand signals, new market entry
4. Decision-maker accessible - founder, CEO, CMO, or marketing lead reachable via IG/LinkedIn/email
5. Visiomind fit - the problem maps to one of our 6 services

Tracking

Every prospect gets logged with:

- Company name
- Vertical
- Stage: Identified → Contacted → Replied → Conversation → Discovery Call → Proposal → Negotiation → Won / Lost
- Date of last action
- Owner (B or P)
- Notes

Operating Rhythm

This is not a one-time list. It is a weekly operating system:

- Monday: Review pipeline. Identify the week's batch (10-20 prospects from one or two verticals).
- Tuesday-Wednesday: Research, diagnose, prepare outreach for the batch.
- Thursday: Send outreach. Follow up on open conversations from prior weeks.
- Friday: Log results. Review what worked. Adjust approach for next week.
