

VisioMinds — July 2026 Growth Plan

The one problem this plan solves: *We have the team, the skill, and the tools. We don't yet have enough clients. This month is built entirely around fixing that — the way Forth Canvas's CEO told us to.*

The core message (tape this to your screen): *"It's not a straight line. Increase the surface area. Make more people aware. Make the work undeniable. Stay consistent. Clients will start knocking."*

How to use this in Notion

1. In Notion, create a new page → paste this whole document in. Headings, tables, and checkboxes convert automatically.
2. The ☐ boxes become clickable to-dos. Tick them as you go.
3. **P** = Paul · **B** = Bolu. Every task has an owner.
4. Work **Mon–Fri**. Weekends are light/optional (engage only, no obligations) — we are deliberately *not* posting or grinding daily.
5. At the end of each week, fill in the **Weekly Review** block before starting the next week.

The 5 Principles Behind Every Task

#	Principle	What it means for us this month
1	Relationship building is the long game	20 conversations may yield 1 client. That 1 matters. We play for the compounding effect, not instant wins.
2	Have conversations, not pitches	We reach out to founders to <i>talk</i> , not to send a deck. Low-pressure, genuine, specific.
3	The portfolio closes the deal	A DM opens the door; the work decides if they walk through. Our portfolio must be undeniable.
4	Over-deliver on every project	Treat each client as a chance to expand our craft — even beyond the brief. Track record = future referrals.
5	Increase surface area	Everyone we already know should know what VisioMinds does and how good we are. This is the lowest-hanging fruit.

July Targets (Monthly Scoreboard)

Metric	Target	Actual
New prospects contacted	40 (10/week)	
New live conversations started	8+ (2/week)	
Existing-network people updated	12+	
Discovery calls booked	3–5	
Proposals sent	2–3	
Anchor posts published (IG + LinkedIn)	5 (1/week)	
Portfolio improvements shipped	4	
New clients signed	1–2	

Reality check: Signing 1 client this month is a win. The real goal is a full pipeline by end of month — conversations in motion that convert in August/September.

The Weekly Engine (repeats every week)

This is the rhythm. Every week follows the same five-day shape, so it becomes a habit:

Day	Theme	Core actions
Monday	 Plan & Prep	Pick the week's 10 prospects, research them, decide the week's post
Tuesday	 Outreach Day 1	Each partner sends 5 personalised DMs. Log every one.
Wednesday	 Content Build	Build the week's post (carousel + caption) from a case study
Thursday	 Conversations + Publish	Reply to leads, push toward calls; publish post to IG + LinkedIn
Friday	 Follow-up & Review	Follow up non-responders, update pipeline, weekly review
Sat/Sun	 Light	Optional: like/comment on prospects' posts. No obligations.

Posting cadence: ONE anchor post per week, adapted for both Instagram (carousel) and LinkedIn (text + images). Published Thursday. That's it — no daily posting.

Outreach DM template — conversation, not pitch

*Personalise the **bold** parts every time. Never send a deck first.*

Hi [Name] – I've followed [Brand] for a while and genuinely rate ****[specific thing you admire]****. I run VisioMinds, a brand & design studio here in Lagos – we recently rebranded ****[relevant client, e.g. Cleaniche]****.

Not pitching anything. I just think there's real room to make [Brand]'s brand identity match the quality of the ****[product / work]**** itself. Happy to share a couple of quick ideas if you're open – either way, keep doing what you're doing 🔥

Network update template (existing contacts — surface area)

Hey [Name]! Quick update – I've been building VisioMinds into a proper brand & design studio. Just wrapped [project] for [client]. If you (or anyone you know) ever needs branding, a website, or design that actually moves the needle – think of me. Here's a bit of recent work: [link]

Portfolio audit checklist (ongoing — Principle #3)

- ☐ Would this convince someone who found us cold, in 30 seconds?
- ☐ Is every case study framed as **Problem** → **Strategy** → **Design** → **Result**?
- ☐ Are all 5 published case studies live and consistent on the site?
- ☐ Is there one clear, central home for the work (site / Behance / Notion)?
- ☐ Does the strongest work appear first?
- ☐ Is the WhatsApp CTA present and working on every page?

Simple Pipeline stages (track every prospect)

[Contacted](#) → [Replied](#) → [Conversation](#) → [Discovery Call](#) → [Proposal](#) → [Negotiation](#) → [Won / Lost](#)

Ongoing habits (beyond July — Principles 1, 4, 5)

- ☐ Keep meeting new people; nurture relationships even with no immediate need
 - ☐ On every client project, find one way to over-deliver beyond the brief
 - ☐ Document every project (even small ones) the week you finish it
 - ☐ Treat every client as a long-term relationship → referrals + repeat work
 - ☐ Stay consistent on social — one strong post a week beats ten rushed ones
