# FINISH REFERENCE FOR MODELLING

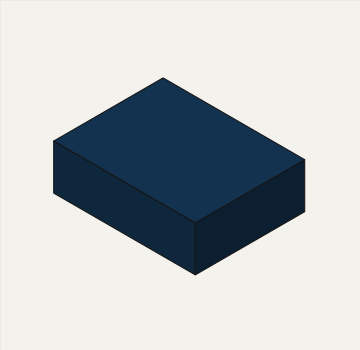

Colour values are the target for the base colour of each material. Roughness values give the surface character of each finish, from the mirror polish of Fleur to the bead blast of Noir.

| NAME | METAL | SURFACE | LENS |
|---|---|---|---|
| **Fleur** | Polished silver titanium<br>#C9CCCE | Metallic 1.0<br>Roughness 0.12 | Clear grey lens<br>#A9ACAB |
| **Gris** | Brushed gunmetal titanium<br>#4A4D50 | Metallic 1.0<br>Roughness 0.35 | Smoke lens<br>#4B4540 |
| **Noir** | Matte black titanium<br>#151515 | Metallic 1.0<br>Roughness 0.55 | Deep grey lens<br>#2A2B2C |
| **Rose** | Rose gold titanium<br>#C9988A | Metallic 1.0<br>Roughness 0.15 | Soft amber lens<br>#D9A66B |
| **Ambre** | Warm gold titanium<br>#C8A25A | Metallic 1.0<br>Roughness 0.15 | Amber lens<br>#C9812A |

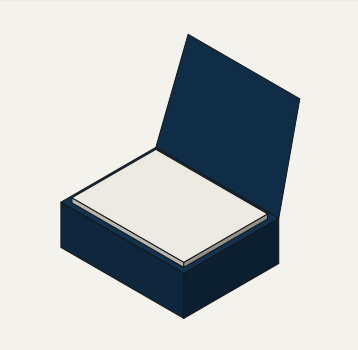

| MATERIAL | REFERENCE VALUES |
|---|---|
| Lens | Smooth glass-like surface, index of refraction 1.5, transmission set by the tint, a faint gradient from darker at the top to lighter at the bottom. |
| Nose pad | Clear silicone, roughness 0.3, slight translucence. |
| Engraving | Bare titanium showing through the colour, cut 0.14 mm, base colour #B9BCBE on the coloured finishes and a darker tone on polished silver. |
| Brushed zones | Fine grain along the length of the temple, a bump strength of about 0.08. |
